Dr. Joshua Lederberg
Department of Genetics
The University of Wisconsin
Madison 6, Wisconsin

Dear Dr. Lederberg:

Thanks very much for the cultures which came through in good condition. We will get by all right without Y-24 so we won't have to worry about that.

Regards.

Sincerely yours,

W. S. Stone

Wilson S. Stone.

WSS/S

P.S. I have often wondered if you got a large amount of recombination from your "permanent" heterozygotes when you induced them to form large cells by short exposures to UV or such agents.

W.S.S.
